Here's what the new 3%% interest rate on U.S. Savings Bonds means to you:

 $^{\$}3$ = $^{\$}4$ fourteen months faster than before

The Bonds you own are better than ever, too

The new 34% rate means your savings grow faster than before with U.S. Savings Bonds. \$3 becomes \$4,000 in just seven years, nine months. This applies to all Series E Bonds bought since June 1, 1959.

Then, all older Bonds, both Series E and H, pay more now—an extra 4/8 from June 1 on, when held to maturity.

And, all Series E Bonds carry a new 10-year extension privilege. This means your Bonds will keep earning liberal interest automatically after maturity.

These three new cash benefits make today's U.S. Savings Bonds the finest in history. They make the ones you own now better, too.

More advantages of U.S. Savings Bonds

You can save automatically. Just tell your company how much to deduct every payday for Bonds, and your Bonds will be delivered to you. This way you can't forget to save. And, remember, the money you don't touch can't slip through your fingers.

You can get your money, with interest, when you need it. Your Bonds are a ready reserve to use anytime you wish. But, it pays well to hold them.

Your savings can't be lost or stolen. The U.S. Government guarantees to replace your Bonds, free, if anything ever happens to them.

You save more than money. The Bonds you buy help keep the peace because peace costs money. Money for better education, new scientific research, greater military strength. And the money you save helps strengthen our nation's economy which depends on the financial strength of individuals to keep it sound.

Start saving with U.S. Savings Bonds today. You'll save more than money.

The Way to Fight Cancer

ROBERT Frost once wrote about two roads that diverged in a woods and he "... took the one less traveled by, And that has made all the difference."

I thought about these lines the other day when a touch of spring in the air made me feel how good it was "When that pain — which turned out to be cancer — developed two years ago, I had choice of two roads, One was to live with my pain a little longer — to "wait and see"; the other was go to a doctor.

I did consider the "wait and see" road, but not for long. I took the other.

"And that has made all the difference."

I took the road "less traveled by" — and it is "less traveled by" because a great many people do not know Cancer's Seven Danger Signals of the straveled by "which was a straveled by "because a great many people do not know Cancer's Seven Danger Signals of the straveled by "which was the straveled by "because a great many people that if followed takes you to your best protection against death from cancer. And if some 45,000,000 Americans now alive — that's the number who will develop cancer if things go on as they are—do not take the road "less traveled by," their chances of dying will be greater.

So take the road to better health and life. It is your responsibility; the family's responsibility. The danger signals of cancer and the ann'ell health checkup should be as much a part of your neath program as eating and sleeping. % interest on U.S. Savings Bonds

The Treasury explains why the new ones you buy and the ones you own now are better than ever

- Q: How does the new 33/4% interest rate benefit me?

4: How does the new 3½/% interest rate benefit me?

A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to 2½% for the first year and a half; then a guaranteed 4% each year to maturity.

When did the new rate here of the property of the

- Q: When did the new rate become effective?
- A: June 1, 1959.

- Q: Does the new rate change the Bonds I bought before June 1, 1959?
- A: All older E and H Bonds pay more now—an extra
 %% from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.
- Q: Will the Bonds I own automatically earn their new rate?
- 4: Yes. You don't need to do a thing—just hold on to your Bonds.
- Q: When my E Bonds mature, will they keep on earning interest?
- A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning in the property of the state of ing interest after maturity.
- Q: With the new interest rate, should I cash in my old Bonds and buy new ones?
- A: No. The automatic ½% increase makes it unnecessary—and in almost every case it is to your advantage to retain your present Bonds.
- Q: How are series H Bonds different from series E Bonds?
- A: The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

- check every six months for the life of the Bond, You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the father. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.
- Q: In what denominations can I buy series E and series
- A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$15.00), \$500 (cost \$75.00), \$10,000 (cost \$75.000), \$10,000 (cost \$7.500.00).

 H Bonds: \$500, \$1,000, \$5,000 and \$10,000. They are priced at face value.

- Q: How safe are U.S. Savings Bonds?
- A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop, that it can only grow.
- Q: What if my Bonds should be lost, stolen or de-
- You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.
- Q: Where can I buy Bonds?
- A: Buy E Bonds at any bank—it takes only a few min-utes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you mame automatically de-ducted every payday. The Bonds you buy by installments are detirered to you automatically, too. Your bank will take your order for H Bonds.
- Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?
- A: Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

Cancer Crusade In Final Drive

Palm Beach County's Cancer Crusade volunteers are staging an all-out finale this week in an at-

all-out finale this week in an attempt to reach a fund goal of \$100,000 in the county.

The April Crusade, according to Fred Teverbaugh, county chairman, has every mark of being a success, since early returns disclose that residents are increasing. their contributions in the fight against cancer. The educational phase of the Crusade being con-ducted in connection with the fund drive, is also proving its worth as a means of altering residents to the danger of cancer, the chairman added.

The volunteers, he said, have set an enviable record for themselves, in the early part of the campaign, with the county leading the entire state in contributions to the drive A report from the American Can-cer Society's state office shows Palm Beach County leading the eampaign with contributions \$55,000.

S55,000.

Teverbaugh credited a Cancer Benefit held in Palm Beach for making up most of the early returns. The affair, a highlight of the resort city's social season, netted \$44,000 for the Crusade. Another \$5.000 he midted \$44,000 for the Crusade. Another \$5,000, he said, was raised in January by Boca Raton's Cancer Crusaders. The balance of the money turned in, has come from memorial grants and partial returns from the county campaign.

More than 30 communities in the

county, Teverbaugh said, are con ducting active campaigns this year with the largest number of volun-teers ever recruited for the county Crusade, taking part.

COUNTY SEAT TALLAHASSEE
Leon County, located in Northwest Florida,
was formed in 1824 and named for the
Spanish explorer, Ponce de Leon. The
capital of the Apalachee Indian nation was
located here when Hernando De Soto
visited the area in 1839.
The town of Tallahassee was established
by Seminole Indians, and in 1823, two years
after the United States took possession of
Florida, it was selected as the state capital. Today it is the seat of government
for the great state of Florida and is the
site of two large state educational institutions.

tulions.

In progressive Leon County, and throughout Florida, the United States Brewers Association works constantly to maintain the sale of beer and ale under pleasant, orderly conditions. Believing that strict law enforcement serves the best interest of the people of Florida, the Association stresses close cooperation with the Armed Forces, law enforcement and governing officials.
